

Slide Panel Flex System 30 Rounded

KURAGE[®]
acoustic design solutions

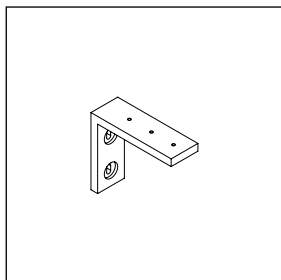

- Slide Panel Flex is a slidable and flexible system with 360° reversible panel elements.
- Class A absorbent.
- Each panel is suspended and runs in one wheel and one guide rail. Option for a 90° curved rail.
- The panels can be parked in parallel, thereby saving space.
- Built-in magnets help keep the panels together when in the unfolded position.
- The textile is detachable, cleanable, and has sewn-on elastics, which ensures constant stretching of the fabric.
- Option for printed as well as unicoloured textiles.
- Visible side list of extruded aluminum.
- Acoustic core of mineral wool made of natural minerals.
- Available in both standard and special sizes.
- Thickness 27 mm.
