Slide Panel Flex

As with most compelling and seemingly obvious ideas, simplicity is the hallmark of Slide Panel Flex.

360° reversible panels suspended from a ceiling-fitted sliding system with just one guide rail. Each from just one suspension point. Slide Panel Flex is Class A sound-absorption and as the icing on the cake, Slide Panel Flex saves space when not in use.

These are the distinctive nobility features that give the series its imaginative, flexible functionality for multiple environments and occasions.

Perhaps a restaurant can now create a new room within a room for a special dinner party. A large, open office needs to switch between private meetings, stress reduction and daily openness. Or a hotel can offer guests the opportunity to relax in varying exclusive surroundings in the lounge area.

Furthermore, Slide Panel Flex embraces Kurage's sustainable vision with long-lasting, detachable and washable textiles. It offers high-level aesthetics and extensive design freedom depending on your individual room size, stylistic taste and your acoustic and functional needs.

In short, the sky's the limit when it comes to the various uses of Slide Panel Flex. The list is not exhaustive and is far from complete. However, here are some specific examples of where you can easily integrate the series into your particular environment – and why. Be it a private company, a public space or special settings.

Slide Panel Flex – simplicity, flexibility and design freedom in one. Enjoy!

Restaurants

For restaurant guests, it's all about the gastronomy, the wine, the good company.

To achieve that magical atmosphere, factors such as acoustics and privacy are vital. This is where the new sound-absorbing space divider Slide Panel Flex enters the frame, seamlessly covering all criteria.

Enjoy the finer moments of life

Slide Panel Flex gives you the option to create new rooms, tailor-made spaces or private zones within the restaurant. Featuring 360° reversible panels, Slide Panel Flex is easy to slide to the side and park up against walls or columns to suit the specific evening and number of guests or parties, thereby saving space.

Restaurants

To support our sustainable vision, the panels are produced with mineral wool and are long-lived due to the easily changeable textiles.

Variable spaces

In short: Slide Panel Flex offers the freedom to enjoy the finer moments of life in dynamic and changeable rooms, spaces and zones. A restaurant owner's choice.

Make room for a new, more flexible and dynamic way of thinking with variable spaces in restaurants.

Lounges

Time is luxury. Space is living it.

Slide Panel Flex reflects our dynamic, changing world by giving you the opportunity to enjoy peaceful moments in a private zone while still being a part of the action.

Distinct design and advanced acoustics

Whether it's the lounge area of a hotel, a conference centre or a bar, it's all about relaxation and peace while observing life. In the periphery, yet still a part of it all. With its optimised acoustic effects and stylish design, Slide Panel Flex offers the right settings for a temporary stay in a homely lounge zone.

Slide Panel Flex represents high-level aesthetic design with built-in acoustic effects. As part of Kurage's sustainable vision, the textiles are produced with mineral wool and are long-lived, washable and easy to replace.

Aesthetic lounge life

360° reversible panels in just one ceiling-mounted rail, only one suspension wheel, and Slide Panel Flex includes the distinctive Kurage signature: the visible aluminium profile.

When it comes to lounge areas, Slide Panel Flex is quality time and quiet exclusivity in one simple, imaginative solution.

Offices

Expand. Split. Flip. Save space. The choice is yours in the changeable office.

An office doesn't have to look the same each and every day, but can change according to current work needs. Slide Panel Flex is the new radically flexible option for this very purpose.

360° room transformation

Slide panels that can turn 360°, running in just one ceiling-fitted guide rail. Each in only one suspension wheel. This means freedom to transform the room with new functionality, sections and aesthetic design. Includes an option to add a 90° curved rail.

Offices

Furthermore, Slide Panel Flex is lightweight, discreet, designed to deliver Class A sound absorption and provides a better sound environment than heavy curtains and traditional folding walls.

No stress. Privacy vs. openness

Improve employee well-being, create the feeling of pleasant spaciousness and counteract the risk of stress with a sensible and innovative acoustic design solution in the office.

Privacy when required, openness when desired.

Cafées

Enjoy a cup of coffee in a semi-private zone on a sunny afternoon at your regular café.

The flexible Slide Panel Flex combines room partitioning, screening and soundproofing all in one. Moreover, due to its 360° reversible panels, you can transform the room very quickly.

Time to refuel

Life is richer when you have the time and space to stop for a little while. Time for reflection and space to refuel with coffee, food and renewed energy. That could very well be at your favourite café, and in a Slide Panel Flex zone.

acoustic design solutions

Cafés

That's because Slide Panel Flex offers your guests the necessary optimised built-in acoustic effect. Because it brings aesthetic style and class to the cafés interior, while still being discreet.

Freedom and flexibility all in one

Each panel is suspended from a ceiling-fitted sliding system with just one guide rail, and every panel can turn a full 360°. This gives you the freedom to design and create a zone or booth within the café.

Slide Panel Flex delivers Class A sound absorption and provides an excellent sound environment for cafés.

Large and open offices

Add some character. Individualise large and open offices and inspire your everyday environment.

Open offices have their obvious advantages. They make people more visible and available. But not necessarily more productive or content.

Flexible space vs. open office

Slide Panel Flex is available in multiple colours, patterns and long-lasting detachable textiles. The system offers a new kind of balance between openness and privacy. Because it doesn't always have to be one or the other.

KURAGE[®]
acoustic design solutions

Large and open offices

With 360° reversible panels, the system can be integrated and fit into several kinds of building, including large and open offices. Create a nearly enclosed space or make one panel the room's door.

Stylish functionality

After use, you can simply slide the panels aside and park them in parallel to save space. To support our sustainable vision, the textiles are long-lasting, detachable, washable and easy to replace.

Slide Panel Flex is stylish and flexible functionality, ideal for switching between open and private spaces.

Meeting rooms

An important business meeting requires privacy and an optimal acoustic environment.

Slide Panel Flex may well be the highly flexible, multi-functional and elegantly designed solution required.

Designed for Class A sound absorption

Slide Panel Flex delivers Class A sound absorption. It provides a better sound environment than curtains and is a simpler, more elegant design solution than traditional folding walls. Every panel can turn a full 360°, allowing you to create an additional meeting room within a room. Private yet accessible.

Meeting rooms

As the icing on the cake, the panels can easily be parked in parallel, thereby saving space when the meeting is finished.

Think outside the box. No business as usual

From an open office to a discreet meeting room and back again in no time, qualified by strong acoustics and a simple, imaginative solution. When a productive life is too short for unwanted noise and disturbance.

Just flip the reversible panels as desired and create a new room within the room for your business meeting.
